

COVID-19

How to contact vaccine providers

For Coloradans age 70 and over

Many hospital systems in Colorado are now working to schedule vaccine appointments with Coloradans age 70 and over, who are eligible to get vaccinated as part of phase 1B -- and many more are working to come online. In some cases, hospitals will reach out to their patients. In other cases, patients of these hospitals may sign up to be contacted about scheduling a vaccination. The rate at which hospitals are able to vaccinate Coloradans age 70+ depends on the federal supply of vaccine. Because we are trying to move as fast as we can, we will provide information as soon as it's publicly available, and we ask that you be aware that it will evolve, change, and grow over time. The following list details how patients of these providers can sign up to be notified when a vaccine becomes available.

UCHealth

UCHealth is using My Health Connection, their online patient portal, to communicate with patients. If you are a current UCHealth patient and do not have an active My Health Connection account, please [sign up at UCHealth's website](#).

If you are not a current UCHealth patient and would like to be placed on a list to receive the COVID-19 vaccine when it is available, please check the website by this weekend to sign up.

Denver Health

[Denver Health](#) is currently working to contact and make appointments with patients age 70 and over who currently receive care at a Denver Health facility or have received care in the past three years. Invitations are now being sent by MyChart to schedule these vaccinations. Tickets to schedule COVID-19 vaccinations for patients 70 or over are being generated in a phased fashion. For those with MyChart accounts or willing to sign-up for one, this will be a much quicker process for scheduling your vaccination. [Find instructions to create a MyChart account at Denver Health's website](#).

Centura Health

- [Provider search](#)
- [COVID-19 information center](#)

If you are a Centura Health patient, you will receive an invitation when it is your time to receive the vaccine through MyCenturaHealth, their patient portal. These invitations will be sent based on the state tiering system, starting with patients age 70 and over. An appointment is required to receive the COVID-19 vaccine and walk-ins cannot be accommodated. They plan to make the vaccine available to all members of the community and details will be posted on the Centura.org website once available. Coloradans can take action now by establishing care with a Centura Health Physician Group primary care provider in their area.

Banner Health

- [Banner Health Center Summit View in Weld County](#)
- [Banner Health Center at Lady Moon in Larimer County](#)
- [Banner Family Medicine-Brush in Morgan County](#)
- [Banner Health Family Care Clinic in Logan County](#)

Please take the survey linked above to determine if you are eligible to receive the vaccine. Please schedule your appointment online as the Banner Health System is receiving a high number of requests for appointments.

Kaiser Permanente

For Kaiser Permanente members 70+ (and others in eligible 1A and 1B categories) visit [Kaiser Permanente's vaccine webpage](#) to complete the "COVID-19 vaccine sign up." Upon providing your information to them, you will be placed on a first-come, first-served wait list for the vaccine based on your eligibility.

Vail Health

Visit [Vail Health's website](#) to make an appointment and see their clinic schedule.

Boulder Community Health

[Boulder Community Health](#) is contacting current patients age 70 and older on an ongoing basis to encourage them to schedule a vaccination. Next they will be opening up vaccinations to 70+ patients of affiliated and community providers. Based on current vaccine supplies, it will take several weeks to vaccinate every patient age 70 and older. They ask for their community's patience during this extended process.

HealthONE (coming soon)

At this point, HealthONE hospitals (The Medical Center of Aurora, North Suburban Medical Center, Presbyterian/St. Luke's Medical Center, Rocky Mountain Hospital for Children, Rose Medical Center, Sky Ridge Medical Center, Spalding Rehabilitation Hospital and Swedish Medical Center) only have enough vaccine for our colleagues, physicians and their staff members, and other providers in the community. We are currently providing first and second dose vaccinations to those groups with the limited number of resources we've received. Please check [HealthONE's website](#) for updated details.
